

Waeco and Haines Hunter Join Forces

Boat buyers are set to benefit from a new partnership between Waeco Pacific, Australia's leading mobile refrigeration provider, and Haines Hunter, one of the countries most renowned boat builders.

The agreement guarantees the inclusion of award winning refrigeration units in all Haines Hunter's six and eight metre models as an option.

With times changing, boat owners increasingly want to entertain family and friends on the water. They demand boats with features which cater to fishing, functionality and comfort.

The Haines Hunter name is synonymous with quality, durability, style and safety on the water. The choice for onboard refrigeration was easy, the award winning Waeco Cool Freeze 40 AC.

It has an easy to use operating panel, with digital display, and a turbo quick chill function that can reach a preset temperature in just minutes. Tested independently with 12 other fridges, the CF-40 recently won the title of "Best Compact Fridge" as voted by Australian 4WD Monthly magazine.

The CF-40 runs like clockwork, keeping its maximum internal temperature within about a degree. It also has the lowest energy consumption figures of the entire 13 fridges tested.

It is compact with a deceptively large capacity of 37 litres – enough to fit in all your needs.
